Morva - Shoe Store

(E-commerce store)

Readme/Abstract:

This project is a modern **shoe store e-commerce platform** built with **Next.js** and styled using **Tailwind CSS** for a responsive, user-friendly interface. It is optimized for **SEO** and **Core Web Vitals**, ensuring fast performance, better search rankings, and smooth user experiences.

The store includes **multi-page navigation** (Men, Women, Kids, New Arrivals, Accessories, Collections), **Add to Cart**, **secure payment integration**, a **search bar**, and **Clerk-based authentication** for secure user login and account management. Users can upload images, while admins manage products and content.

Deployed on **Vercel**, the project leverages server-side rendering, static generation, and edge deployment for scalability and reliability. Overall, it delivers a **production-ready, SEO-optimized e-commerce solution** with seamless authentication and strong performance.

Technologies used:

- Next.JS (recat.js library)
- React.JS (js framework)
- Tailwind CSS for styling (css library)
- Framer Motion for animations
- React-Hook-Form for details by user
- React-Icons for styled icons
- Clerk for login authentications
- Next.JS for making website SEO-friendly
- Git & Github for storing code as backup
- Vercel to deploy project on real browser.

MORVA
Morva is not just a brand, it is a statement. Every design we create carries the legacy of timeless elegance, built for those who deserve to stand apart. Where others chase trends, Morva defines what it means to walk with power and grace.
For the ones who know that royalty is not inherited but chosen, Morva is the voice that speaks of class, dominance, and distinction. Each step you take in Morva is a declaration that you are not just part of the crowd — you are the standard they aspire to.
